

# NESP Threatened Species Recovery Hub Brisbane Roadshow

Thursday 31 May

The River Room, Customs House, 399 Queen Street, Brisbane

Chair and host: Assoc Professor Martine Maron, University of Queensland, Hub Deputy Director

## 9.00am-9.30am Opening and Welcome

Welcome to Country

Welcome from University of Queensland Pro-Vice Chancellor Professor Tim Dunne

Introduction from Queensland Government Representative

Introduction to the TSR Hub from Assoc Professor Martine Maron

## 9.30-11.10am Presentation Session 1

### Species on the brink: identifying and prioritizing action for our most imperilled species

Emergency care – identifying and prioritising action to save fauna at acute risk of extinction – Hayley Geyle, Charles Darwin University

Preventing extinction from myrtle rust and habitat loss: saving our most imperilled plants – Jarrah Wills, Queensland Herbarium

Recovery planning for the Northern Eastern Bristlebird – Zoe Stone, University of Queensland

Discussion

### Strategic planning to prevent declines

Strategic assessment under the EPBC Act – planning to avoid extinction by a thousand cuts – Professor Brendan Wintle, University of Melbourne, Hub Director

Using expert elicitation to improve biodiversity offsetting – Dr Megan Evans, University of Queensland

Everyday nature and biosensitive design in cities – Professor Sarah Bekessy, RMIT

Discussion

11.10-11.30am MORNING TEA

## 11.30am-1.10am Presentation Session 2

### Translocations and reintroductions

Strategic planning for safe havens – Associate Professor Michael Bode, Queensland University of Technology

Strategies and insights from fauna translocations – Dr Nicola Mitchell, University of Western Australia

A guide for translocating threatened species – Dr Lucy Commander, Australian Network for Plant Conservation

Discussion

### Monitoring strategies for species and threats – how are our threatened species tracking?

Beyond the fence—understanding and managing predators for better conservation outcomes – Dr David Roshier, Australian Wildlife Conservancy

Threatened species monitoring – making it count – Dr Sarah Legge, University of Queensland

Developing a Threatened Species Index for Australia – Dr Elisa Bayraktarov, University of Queensland

Discussion

1.10-2.00pm LUNCH

## 2.00-3.00pm Presentation Session 3

### Partnerships for conservation management

Enabling Indigenous-conservation alliances to care for significant species on Indigenous lands – Dr Cathy Robinson, CSIRO and Arakwal partners

What do managers and communities think about management of flying-foxes in urban environments? – Kaye Currey, University of Melbourne

Recovering and managing the Night Parrot – Nick Leseberg, University of Queensland

Shorebird collaborations – Professor Richard Fuller, University of Queensland

Discussion

3.00-3.20pm AFTERNOON TEA

## 3.20-4.40pm Workshop and discussion

4.40pm Final discussion and close
